| <b>G P Sourcing Pvt Ltd</b>   |   | <b>ORACLE</b> |
| Duration  | <b>21, February 2011 – October 2012</b>   |               |
| Address   | Sebiz Square, 4 <sup>th</sup> floor, C6 IT Park, Sec-67, Mohali                   |               |
| Website   | <a href="http://globalpueblosolutions.com/">http://globalpueblosolutions.com/</a> |               |
| Designation   | Senior Application Engineer For Oracle RightNow CX                                |               |
| <p>I have around 2 years of experience working with Oracle - RightNowCX CRM. I have led the Agile pilot batch for Oracle – RightNow and developed tools used in Oracle’s Agile process. I have Implemented 50+ sites for RightNow CRM, which include top telecom companies, Internet retail companies, Automobile, Travel portal, Online real estate companies, computer peripherals companies, etc.</p> <p>I was responsible for Agile development and interfaced directly with Oracle’s upgrade engineering and end-user clients for project reviews and hand-offs.</p> <p>Sites were reverse-engineered, customized, updated, and then seamlessly re-integrated into the client’s web presence</p> <p><b>Reverse Engineering.</b> Did reverse engineering and documented all previous customizations on customer sites, implemented all functionality in the latest version where possible, and rebuilt any remaining customizations and business functionality on the current version to fully migrate a customer’s implementation to the current version.</p> <p><b>Upgraded customizations which were not found in the standard product:</b> Developed/upgraded functionalities like SME, Product Registration, Customer Tool Kit (CTK), Custom widgets and Hooks.</p> <p><b>Implementation of RightNow CX.</b> I have worked on implementing different Workspaces, Account Profiles, Business Rules, Custom Reports, Navigation Sets, Chat Modules, SLAs, Products, Categories, Dispositions, Incident Queues, Knowledgebase Management, etc. in RightNow CX.</p> <p><b>Integration of RightNow product with client’s site.</b> I have integrated the client’s site with RightNow’s product using PTA. PTA is used to authenticate user access from the main site to the RightNow product. Using PTA, a single login can be used to login on both the client’s site and the RightNow product.</p> <p><b>Version controlling using GIT:</b> I have used GIT as a version controlling tool along with Assembla to manage the source code of the projects</p> |   |               |
